3

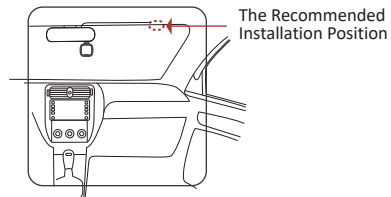

C SIM Card Installation

- ② Insert the Micro-SIM card into the slot in the direction shown in the picture.
- ③ Close the card slot cover and finish installation.

D 4G Cloud Box Installation

The recommended installation position is shown in the diagram, in the upper right corner of the windshield.

i Installation Notes

1. To ensure a good signal, when pasting, pay attention to the double-sided adhesive facing upwards (facing the sky), which means it is suspended inside the car.
2. To ensure good signal, the installation position should avoid metal objects as much as possible.
3. Please ensure that the installation location of the 4G cloud box with GPS function can receive GPS signals.

E Notes

Before use, please ensure that the Micro-SIM card network is unobstructed and that the card is inserted into the 4G cloud box for the first time. (Please do not insert the card into your phone for the first time, otherwise it will be bound to your phone. This card will be bound to the 4G cloud box when inserted for the first time.).

***It is required to use an industrial grade SIM card (MP2) and prohibited from using a regular grade SIM card (MP1). Our company is not responsible for any issues caused by using a regular grade SIM card.**
