

Network Camera-V5.8.13 Release Note- H13U (250715)

Firmware Basic Information	Firmware version:	V5.8.13_250715
----------------------------	-------------------	----------------

New Features

1. Support AcuSeek.
2. Focus adaptation optimization of Point to Point camera, solving the issue of unclear focus in the lens.
3. Audio compatibility issue fixes:
 - 1) The camera side uniformly enables or disables audio, causing the NVR to be unable to separately select audio enablement for the main or sub audio stream.
 - 2) The camera side places the speaker output volume uniformly in the audio interface, causing the NVR side to be unable to adjust the audible alarm output volume.

Modify Function

Customer Impact and Recommended Action

This update refers to function/compatibility improvement and will take effect automatically after the Date of Change. We are very sorry for any inconvenience of use-habit changes caused by this action.
