

Network Camera-V5.8.2 Release Note

(251103)

Firmware Basic Information	Firmware version:	V5.8.2_251103
----------------------------	-------------------	---------------

New Features

1. Newly added support for PTRZ camera models.
2. PTRZ models support the locking feature. After being locked, the device's movements (up, down, left, right) and adjustments (zoom +/-, focus +/-) are disabled. It supports displaying the current self-checking status. By default, self-checking is not performed upon power-on; self-checking must be performed before recalling preset positions. After simple recovery or complete recovery, the device performs self-checking during the first power-on. The interface displays the current initialization completion status once the self-checking is finished.

Modify Function

1. The 12/16MP fixed-focus camera removes the focus mode, lens initialization, and auxiliary focus functions (not removed on the interface). If the customer selects the corresponding functions, the camera will not respond; only manual focus +/- is supported, and manual focusing can be performed in case of out-of-focus situations.
2. Fix the issue of probabilistic failure during device login.

Customer Impact and Recommended Action

This update refers to function/compatibility improvement and will take effect automatically after the Date of Change. We are very sorry for any inconvenience of use-habit changes caused by this

action.

For any questions and request for this firmware, please contact our local technical support team.

Remarks:

- Hikvision reserves the right to change, alter or withdraw the above notification without prior notice.
- Product design and specifications are subject to change without prior notice.
- The Hikvision firmware may contain errors known as errata which may cause the product to deviate from published specifications. Current characterized errata are available on request.
- Hikvision is not liable for any typing or printing errors.
