#### **Reason of Upgrade**

New features and problem fixes

#### **New Features**

Local device supports Brazilian Portuguese

#### **Modified functions**

1. Fix Hik-Connect/HC-T support for active task release, K/VPro T Portal uploads image search, high probability of no results.
2. Fixed KVpro, failed to search twice for AcuSearch after search on iOS
3. Fix iOS KVPro uploading images with high probability of prompting device network abnormalities when searching, but the actual device network is normal
4. Fix missing frame search results in mobile apps and portals
5. Fix KVPro playback image search on iOS, where the same image cannot be analyzed by iOS to identify the target
6. Optimization of streaming search results for people and car types (problem phenomenon: cars find people, people find cars)
7. Fix the issue of abnormal thumbnail search in Hik-Connect image search

8. Optimization of text search interaction
  - 1) The time selection error prompt is not fully displayed
  - 2) Fix the issue of displaying English words in tag groups for multilingual AcuSeek
9. The restriction prompt for multilingual input boxes on non English WEB clients is expressed as "only supports English search"
10. Tag group sentence copywriting adjustment Spanish shirt and female translation modification
11. Fixed the issue of displaying English words in AcuSeek tag grouping under multiple languages.

The copy generated by tag grouping is displayed in English and needs to be adjusted to correspond to multiple languages
