

# Network Video Recorder

## Version: V4.90.320\_build260313

### Release Note

<b>Firmware</b>  <b>Basic Information</b>	Firmware Version:	V4.90.320_build260313
	SDK Version:	NA
	Play Library:	7.4.2.76
	Web component:	V5.1.84_R0102 build 260312
	OpenSDK Version:	V2.16.5_K24B1_STD-V1

### Reason of Upgrade

New features and problem fixes

### New Features

1. 4-channel device memory optimization

### Modified functions

1. Support resetting Hikvision protocol camera password through NVR
2. Remove the automatic configuration function when activating NVR for industry models
3. Support custom languages (sound and light linkage, voice output)
4. Adjust the IP adaptive function of the industry model to not be enabled by default
5. Adjust the industry model plug and play function to default not enabled
6. During the upgrade process, disable the functions of Dual-VCA and Auto Synopsis playback.
7. Before upgrading, turn off the Acuseek and Acusearch engine (switch to Motion engine) to avoid upgrade failure

## **Customer Impact and Recommended Action**

This new firmware upgrade is to improve product performance, and will take effect automatically after upgrading from previous versions. We'd like to inform you the above changes. Also, we are sorry for any possible inconvenience of use-habit changes caused by this action.

For questions or concerns, please contact our local technical support.

Note:

- Hikvision has all rights to alter, modify and cancel this notice.
