

Network Video Recorder

Version: V4.32.406_260427

Release Note

Firmware Basic Information	Firmware Version:	V4.32.406_260427
	SDK Version:	N/A
	Play Library:	N/A
	Web component:	N/A
	OpenSDK Version:	V2.15.4 build 240306

Reason of Upgrade

New features and problem fixes

New Features

1. Add SD card read/write inconsistency detection, check every 15 minutes whether the video file is successfully written to the SD card. After three consecutive failures, report a hard disk error alarm to Hik-Connect
2. Add SD card write protection detection mechanism, check the SD card write protection status every 30 minutes. If the SD card is detected to be in write protection status, report a hard disk error alarm to Hik Connect

Modified functions

1. When configuring dual band mode, first enable 5G and then enable 2.4G

Customer Impact and Recommended Action

This new firmware upgrade is to improve product performance, and will take effect automatically after upgrading from previous versions. We'd like to inform you the above changes. Also, we are sorry for any possible inconvenience of use-habit changes caused by this action.

For questions or concerns, please contact our local technical support.
