Network Camera-V5.9.21 Release Note (260921)

Firmware Basic Information	Firmware version: V5.9.21_260921

New Features

1. The PT34 model adds support for linking motion detection human/vehicle events to the red/blue flashing light.
2. All models support the bitrate self-adaptive switch and can be configured in HC.

Modify Function

Customer Impact and Recommended Action

This update refers to function/compatibility improvement and will take effect automatically after the Date of Change. We are very sorry for any inconvenience of use-habit changes caused by this action.

For any questions and request for this firmware, please contact our local technical support team.

Remarks:

- Hikvision reserves the right to change, alter or withdraw the above notification without prior notice.
- Product design and specifications are subject to change without prior notice.
- The Hikvision firmware may contain errors known as errata which may cause the product to deviate from published specifications. Current characterized errata are available on request.
- Hikvision is not liable for any typing or printing errors.
