1

Learn About Router

Check User Manual for more indicator rules.

Power	Solid Blue: Power is on.
WAN	• Solid Red: The Internet is not accessible. • Solid Blue: The Internet is accessible.
LAN	Solid Blue: At least one LAN port is connected.
2.4 GHz	Solid Blue: The 2.4 GHz wireless band is enabled.
5 GHz	Solid Blue: The 5 GHz wireless band is enabled.
WPS/MESH	Solid Blue (for 5mins): WPS connection or MESH networking is finished.

Status Indicators

Interfaces

RESET	Long press for 8s to restore to defaults.
	Long press for 1-3s: • Password-free accessed by wireless devices; • Mesh networking with Hikvision routers.
WAN/LAN	Connect to an uplink device (e.g. modem).
LAN	Connect to downlink devices (e.g. IPCs, PCs).
POWER	Connect to the power supply adapter.

2

Connect Power Supply and Internet

Refer to the figures below to complete wiring.

Connect to the Internet

Connect to Power Supply

3

Activate Router

Follow these steps to complete the initial activation of the router.

Check the Label

Obtain Wi-Fi name and IP address.

Wi-Fi Name(SSID): HIKVISION_XXXX
IP Address: 192.168.9.1
Login Address: <http://hikrouter.net>

Connect to a Wi-Fi Network

Connect your device to the Wi-Fi.

Enter Activation Page

Automatically redirect to the page.

Select your Country/Region

If not, you can manually enter IP address (**192.168.9.1**) or login address (**<http://hikrouter.net>**) in the browser.

Create New Wi-Fi

Your router will work independently and create a new Wi-Fi network.

Start Initial Configuration

Select **Router Mode** and follow the steps below to complete the configuration.

1. Device Connection

Make sure the router is connected to the network.

2. Network Config: Detect your network type or select manually.

- **DHCP** is recommended. No configure is required.
- Select **PPPoE** if your ISP has provided broadband account and password.
- **Static IP** is not recommended unless your ISP has provided an IP address and other information.
- Set Wi-Fi password -- For connecting the Wi-Fi
- Set Admin password -- For managing the device

NOTE: Please check more information about VLAN and VPN on the User Manual.

Completed

Wi-Fi will restart.

Extend Wi-Fi Range by Mesh

Quick activate the sub router and expand Wi-Fi coverage of the main router.

【Steps】

1. Power on **B** and place it near **A**. The power indicator on **B** is solid blue.
2. Press the buttons on both **A** and **B** for 1-3 seconds. Wait until the WAN indicator on **B** is solid blue.
3. Disconnect the power supply on **B**, and place it in the location where Wi-Fi coverage needs to be expanded.
4. Reconnect **B** to the power supply. Wait until WPS/MESH indicator on **B** is solid blue again.

【Note】

- The Wi-Fi names and passwords of A and B are the same.
- If step 2 is failed, try to connect a LAN port of **A** and the WAN port of **B** by an Ethernet cable, and repeat the next steps after the WAN indicator on **B** is solid blue.

① Please refer to the **More Information** and get methods for devices that do not support Mesh.

【Before You Start】

- Ensure that both routers support Mesh.
- Ensure that **A** can access the Internet normally.
- Ensure that **B** is unactivated (long press the RESET button for 8s to restore if it has been activated).

Power and WAN Indicator are Solid BLUE

Reconnect to the Wi-Fi after status checking.

Enjoy fast and smooth surfing !

Manage Your Router Anytime, Anywhere

1. Download Apps

Scan the QR code below to download the apps. Both the apps can help you manage your device remotely.

2. Open an App and Login

Create a new account to login if you don't have one before.

3. Add Device

Scan the QR code on the lable of the router, and follow the steps on the APP to complete the setup.
