

IPD V5.7.12 Release Note

(2022-12-5)

Firmware Basic Information	Firmware Version: V5.7.12 Build221102
---	---------------------------------------

Features

● Modified Features

1. The new OSD mechanism is imported to prevent frequent Flash wiping by an external third party using the OSD user-defined characters;
2. HIK CGI protocol support is removed from O-STD products;
3. Supports online EZVIZ upgrade, which solved the problem of incomplete memory release of DSP during the upgrade

Customer Impact and Recommended Action

This update refers to function/compatibility improvement and will take effect automatically after the Date of Change. We are very sorry for any inconvenience of use-habit changes caused by this action.

For any questions and request for this firmware, please contact our local technical support team.

Remarks:

- Hikvision reserves the right to change, alter or withdraw the above notification without prior notice.
- Product design and specifications are subject to change without prior notice.
- The Hikvision firmware may contain errors known as errata which may cause the product to deviate from published specifications. Current characterized errata are available on request.
- Hikvision is not liable for any typing or printing errors.
